A leading website designing and development company in India which provides the best services in the various filed. From the date of conception, We at Fiwdc, have been innovators, leaders as well as pioneers right in the driver's seat of search engine optimization, web design, social media and search engine marketing. We just do not provide digital marketing services; we are like a brain storming tank. We only employ super bright professionals who keep us in the lead. Fiwdc has strived to keep ahead of its competitors by giving our partners effective, honest and prolonging SEO services. We understand that SEO is an industry which is subject to fluctuations. What might have worked yesterday may not work today. But with all our experience backing us we have seen all the changes so far. Change is but inevitable and that too in this age and digital world. But what makes us good in our job, is our talent and skill and flexibility so that we can respond and react fast to the changing algorithms and practices of Google. We apply these to our customer's campaigns and that way they also stay right in front of their competition. It used to be a game of getting the correct and apt SEO keywords. But now it is no longer a game, it has evolved into a complicated process which involves various areas of expertise. No keywords equals to no SEO. Then again, just using those keywords on the pages will not be enough. It is our aim to help in the growing of your business and that is done by the increase in your rankings, bringing in more traffic, giving your visitors an excellent experience and making those visitors into customers. All you have to do is concentrate on your business. We'll do the rest for you!

What do you get with FIWDC?

When you're website designing company plus SEO agency intelligently and properly manages your campaign it would automatically save you several hundreds or thousands in money. FIWDC aims at increasing your calls, leads as well as sales through the right kind of SEO.

- Get calls – We have the best software in call tracking, reporting as well as local listings. You will see how your phone rings off the hook once we're done.
- Get sales – When you get more calls, leads or more traffic that automatically leads to more sales for you.
- Get leads – Our landing pages which are custom designed just for you would capture more customer information and these hot leads could bring in more new business.
- Get traffic – Just getting traffic doesn't really matter. The traffic needs to be targeted and relevant. We optimize as per your chief demographic and bring in valuable business intelligence.

FIWDC.com innovative processes are the result of our years of expertise in this very fastest growing business. We strongly believe in values, in expressing our wide array of opinions, sharing our experiences with our past customers and bringing in new tactics. We believe in being up to date with what happens in the industry and teaching not only ourselves but others too on the importance of SEO

and pointers on how to put it into practice in the right way. We expect that you also be a part of that process. FIWDC is a brimming pot of ideas, a treasure box of knowledge and real world experience backing us all the way. It is said that digital marketing can be successful only if there is a proper mix of separate and yet interrelated pieces which work together in harmony. Quite similarly a good blog is the right mix of opinions, issues and topics. With our online marketing blog and SEO you can also be an important member and prospective contributor to your own campaign. We can work together in this process by keeping each other informed. That way, we build a customized marketing campaign for you based on our SEO pointers, industry statistics as well as SEO news and trends.

Company profile of FIWDC

FIWDC is the name that you can rely on in the IT industry in Delhi, India. This website designing company has proved that it is possible to bring quality web designing solutions to the table even in India. Our website development company is based in Delhi and we provide best website designing and development services in India. Our greatest asset is the way we are able to bring together different types of technologies in the easiest way possible because we have roped in the professionals that have not only great experience but also great creativity. As far as our clients are concerned we always believe that each client and their requirements are different. We do not have the same formula for everyone. We rather prefer to meet with the company representatives and talk about their requirements, their company profile and then only we create a strategy for our clients. We never make any false promises regarding the outcome for their websites because we know that with promises there are raised expectations and if they are not meet with it leads to a lot of disappointments. For each of our clients our strategy involves researching the clients and carrying out the audit and analysis for them. This is the only way that we can know about the clients and the way they carry out their business. This allows us to create a solution that is specific to the client and unique to their needs and desires. We are the website designing company that is dedicated towards the cause of providing to our clients the best service possible. Today it is not possible to make it big in the world of internet without having a website that has been designed well and developed according to your requirements and the needs of the end users. We always keep not only the client but also the end users in mind before providing the solutions such as:

- A team that comprises of professional and passionate experts that have the required skill and education.
- We are known to provide solutions to our clients that are dependent on the profile of the company and the way the company works. We do not believe in one size fits all.
- We never impose our decisions on our clients. We work in close collaboration with our clients because they are the ones that are finally going to use the website designed and developed by us.
- When it comes to SEO solutions we always make sure that different aspects of the website are updated according to the most recent standards and the keywords are changed according to the trend for keeping the website in the fore all the time.
- We are dedicated to the cause of the website that we develop and for that we provide support not only till the website is handed over to the client but also beyond that.

Work ethics that we follow:-

FIWDC is known to make every effort to not only deliver quality work but also to understand the needs of the clients in order to provide them with the solutions that are specific to them. The first thing that we do and that makes us different from the rest of the website development companies in the same field is that we take time to carry out the research about the work of the client. Whatever they sell a product or they provide certain kinds of services we do not just blindly suggest them solutions that worked with other clients. We make sure that we know the details of what they do and then only suggest solutions that are tailor made for them. We do not have a set formula that we can instantly apply to all and that makes us different from those that provide instant solution because the same solution worked for the other company. We believe that by applying the solutions we provide our client must stand out in the crowd and be able to create a niche of their own. We believe that our clients can only be successful when they are unique in their approach. We are therefore dedicated to creating solutions that are specifically designed for each of our clients keeping their uniqueness intact giving them a chance to stand out.

Reasons behind choosing us

From the hundreds of website designing companies in Delhi NCR that may promise you certain position on the search engine and that too in very little time why should you choose a website designing company like us that is not promising anything like that? Well, we have reasons that will compel you to choose us:

- The first and the foremost reason is that we only give correct assessment of your future prospects based on extensive research of your website and your current position.
- The solutions that are provided by us are affordable and will bring definite changes to your position on the search engine.
- We provide for various aspects of website development including designing and SEO support that helps your website achieve the feat that it had aimed for.
- We are the company that is dedicated to make the small and medium sized businesses as strong as is possible.
- We are a competitive bunch of people and we are in competition with not others but ourselves. Each time we deliver we try to outsmart ourselves with creative ideas. We do not shy from hard work and make all efforts to deliver what we promised in the time limit that was decided upon.

Our website designing company we at FIWDC, is dedicated to the cause of our clients and that is the reason that we make sure that our client is roped in at every step and even after the website is handed over to the client we make sure that they are able to operate it without any problem at all. We always make sure that the support is extended to the client even after the website starts functioning. This is the reason that all our clients are fully satisfied with our work without any exceptions at all.

Process of our website designing company

We at FIWDC believe in bringing in results. It is our priority to make your business grow. This essentially means that we increase the traffic to your site, raise the product or service awareness. To bring this

result, we have a team of highly qualified experts in various fields, who not only meet our expectations but also bring in that extra zing. We only hire those who are interested in continuously improving themselves and our SEO company and bring in quality work. Internet marketing is a continuous process and keeps evolving and changing. So our team works hard to keep up with all changes with the latest technologies, developments, know-how and tools. We work with our clients and let our results do the talking. We have been moved and shaken by our client satisfactions and we take pride in our qualitative work.

Our process of web designing – It is our creativity with tactics:-

FIWDC has the expertise! Professional and high quality web design is an absolute key to the effectiveness and legitimacy of your presence online. Our web designers have the technical expertise and marketing know-how – they have completed several projects which gives them the confidence and extra zing in building customized and attractive websites all in the mindset of keeping your interests. We give your business website themes which are conversion oriented and completely incorporated ecommerce solutions which differ in complexity. This is apt for those who need their online presence so as to sell their product, service or promote it. So as to offer our clients a strong online structure, FIWDC also provides premium hosting services in India with the best technical support so that our client websites are extremely user friendly and easily maintainable and updateable. We also provide you with catalog construction, management or population, allowing our client to be able to display, promote, sell or organize their services or products with upmost ease. FIWDC.com is completely focused only on quality. We strive to give you a personal and responsive approach to every project so that our clients can benefit in every way. We do not believe in outsourcing our work. We work internally and that way maintain our flexibility, quality and control. At the outset, each and every web development project is seen as an opportunity for your business to grow. It is our goal to enhance your retention and increase sales and give you functional and pleasing designs which suit your requirements.

SEO – This is what brings in the traffic

At FIWDC, our team of experts focuses their efforts on improving the exposure and bringing in traffic to the sites of our clients. We have immense expertise and experience under our belt and we have a broadened approach to the improvement of ranking. With major changes happening in Google's algorithm, earlier methods in enhancement of search ranking are no longer valid and in fact harmful.

Our services highlight the following –

- Original content
- Concentration on keyword range
- On-page components
- Off-page Range
- as well as Social media
- Content writing – Content is what is considered as most important by Google. Hence we need to create unique, original, good quality and informative content which is the key to getting top

search engine rankings. Our team of content writers are completely aware of their importance in this entire process. We study your competition, research your particular subject and include all relevant data in our content which is custom written for you. In the center of our SEO efforts is our capability to optimize and develop quality content.

- On Page Optimization – We at FIWDC make sure that your website is good enough that it meets all the present parameters of Google. Our team looks at the code structure, the page's internal linkage, the time taken for the website to load, compatibility among all devices and other various elements which are considered by Google as important when they give your web page a score.
- Off Page Tactics – One of the favorite strategies followed by all SEO companies in India is link building. This needs to be studied very carefully. Due to regular Google updates, a major chunk of techniques that were used for link building do not apply anymore. In fact, they might attract being penalized by the Search Engine. In fact, it can be said that old link building methods have almost been eliminated; hence it takes a huge effort which is inclusive of up to date on-page methods and also complicated off-page tactics. These heavily rely on social media exposure and content marketing. Hence our experts clean the low quality and older links and bring in the most up to date linking structures which involve social outlets and directories. This way your SEO can grow in an organic way.
- Research and Analysis – Search engine optimization isn't only about the straight or usual process. It also needs a very detailed research of not only the keywords but also an in depth research of the competitors, their approach towards SEO, the technical abilities of the existing website if any and the demographic concentration. The diversity of our portfolio and our vast experience has exposed our SEO team to a wide range of scenarios. Our knowledge which has been gained from our past experiences and new ones makes us want to learn more, improve and aspire more. Our SEO campaigns have the ultimate goal of increasing positions which would in turn increase and bring in more traffic, enhance visibility and a higher rate of conversions. Our vast team's experience, our tools and resources allow us to design every campaign in such a way that it revolves around your business – with apt keywords, GEO targets and the right website structure. We hate dreadful long SEO contracts which are risky and cumbersome. So we slice up our SEO services in Delhi NCR into units or sections which have a clear aim as well as time frame. Regular assessment and analysis are an ongoing part of our optimization campaigns. The value behind our strategies is so that we can adapt to the elements which are considered important by the Search Engines not only now but also in the future algorithms. Let our successes come together!

What we do

FIWDC is the only company that is into web designing and development and that is based entirely in Delhi. We have taken the responsibility of serving the customers from every part of India with the web designing and web development solutions that will help them compete with the companies from all over the world. We provide such as SEO solutions that help your website to increase its ranking in the search results as well as improve the overall look and reputation of your website and your company. We have

the team that has the enthusiasm and the vigor to make your website world class. Many a time people tend to try DIY techniques for their websites but since you have understood the importance of hiring the professionals for the website designing and development as well SEO issues you are sure to start with the most positive impact in the Indian market and your business is going to be one of the most successful ones. Only the people who have researched and thought over it again and again make the right decision of hiring the professionals and we make sure that we deliver you the best results possible. We know that when you are investing in any website development company you expect results that are outstanding. We also believe in the same and this is the reason that we first meet the client and know about their expectations. We then carry out a good amount of research about the business they are doing. During the research we make sure that we know all about your business and what uniqueness you are offering to the users. This makes it possible for us to highlight the main features of your business and make the website according to the outcome of the research. Once the website is designed it needs to be shown to the client for their feedback. If there are any improvements to be made we do that and then send the project for website development. Development process is a time taking process because it is that front that will be controlled by the client or the owner of the website. Thus it needs to be such that the client is able to understand the operations and control them. We are always in for the solutions that are user friendly and simple. We know that all the business owners may not have complete knowledge of the website related complications and this is the reason that we are always present to help in any kind of problem related to the website. When this website is approved by the client then only we hand it over to them after making all the corrections that were asked to be made. Now that the website has been designed and developed the most important thing remains is to get them the required recognition. This is not possible in the crowd of thousands of website to make its presence felt all by itself. There has to be some strategy that will lead your website to be recognized by the search engine when the potential client types a keyword related to your niche. The strategies so employed to improve the ranking of a website on the search engine results are known by the name of search engine optimization. SEO is the key to all the success of the businesses these days; at least in the initial phases. Once you have been located by the people your quality of the products and services will further add to your websites' reputation. It is only through good SEO practices that one can achieve great response from the search engine as well as the users. We are aware of the importance of all the three processes and these we see reason that we put special emphasis on all the three processes right from the beginning. We always use the white hat techniques for achieving positive SEO results. Many SEO company may promise you that would bring your website the number one position but that are a lie. No one can bring any website to the number one position except for the end users that need to click on your website and use it to buy products and services. The only duty of the SEO firm is to do everything right and wait for the results. Similarly we make sure that we keep studying the results and bringing about the required change if the things do not work out. This is a hit and trial method and we have to keep observing to be able to understand which methods worked and which ones didn't. This helps us to figure out the best method of bringing you at a more favorable position. We do not hide anything and make it clear with the client that it will take time. Since we do not make false promises, the clients also are happy and content with our efforts. We always rope in the clients for all the projects as we believe that unless the client is not satisfied with our efforts and the steps that we take we cannot implement the changes that we want and achieve the success that we aim for. We are amongst the most reliable

website designing company in Noida who have always believed in rules and regulations because of which we have managed to give websites that are not only successful but are also among the top few pages on the search engine. We are always working as a team and that is the reason that we have so many good ideas to give to each of our clients. We have the most experienced and the most creative people on board and we bring our clients too on board for the wonderful journey of the creation of their website. We make analysis and then depending on our analysis we make decisions. This makes the process sorted and understandable by both us as well as the client and then we figure out the best solution for the clients giving them the best results by raising their ranking and boosting their business.

Our goal of FIWDC

FIWDC is a leading website designing company that providing web designing, development, digital marketing and SEO services in India. It is our goal to provide these services at very competitive rates. It is our vision that businesses have a strong online presence so as to ensure that they boost their business using these internet marketing services offered by us. We have unique designs; the color combinations we use are aesthetically pleasing and visually impactful. Most importantly these are created keeping the business in mind and therefore attuned to what the business is about. The reasons for this are that the aesthetics of the websites play a huge role in the online success of the business. Those websites which are poorly designed are a put off. Consumers want a website which is easy to navigate and use and aesthetically pleasing. We offer our expertise to those that have scratchy websites or those websites which underperform as a result of the design being sketchy. We create and cater to various website design services such as CMS based designs, websites which are responsive as well as mobile website designs. We have designs for ecommerce sites and custom web designs as well. We create the perfect user interface for our clients regardless of the interface they use and the platform they are using. With regards the web development solutions, we have expertise in designing for clients of different sectors such as healthcare, business, finance, academics and even for individuals. We have a variety of solutions and we cater to different industries. Our expertise in this niche includes web templates, Word Press development, application development and PHP development. We also handle website maintenance and our goal is to deliver the maximum return on investment. Once we have design your website in our hands, it gets transformed into a success story. We offer PHP theme service, cart integration for ecommerce sites. We however do not end our services with product delivery. We maintain the websites and even update the schedule so that the customers are provided constant value. Our content management services ensure that every major search engine is able to pick up your website and your rankings improve on organic searches. We specialize in Drupal and Joomla as well as Word Press development with regards the CMS Development services. We customize and develop themes, have integration of Word Press plugins as well as modules in Joomla. We help your business by identifying the right content management solution and implementing it as well. Every business is matched with the relevant CMS. Our aim is to manage data better and ensure that the content moves seamlessly across platforms as well as devices and it is easy to retrieve. The structure of the content we help you to manage. If you want an e-store to be created, we are what you need. We have created many e-stores and these perform incredibly well. If it is launching of the new website for ecommerce or adding of the functionality of e-store to your website, we help you. Custom redesigns of ecommerce are one of our

strong points. We provide web development solutions for ecommerce sites and we do that professionally as well as we ensure that we provide these services at a very affordable rate. Graphics are what capture the audience. A picture speaks a thousand words. Therefore, we believe one banner can be used to convert more visitors than perhaps writing a whole page of text. We create brochures which have a very significant impact on the readers. We ensure that the banners, brochures as well as logos created have the visual impact they are supposed to have and they get their message across in split seconds of it being viewed. Our goal is to provide web development in almost all the languages like, Java, PHP, Word Press, Open cart x, Joomla, Prestashop and Magneto in addition to offering the various payment gateway integrations. We do this by feeding off the passion and talent of each other. We share our expertise and ideas as well as creativity and so ensure that the highest qualities of web solutions are produced. We design templates that are elegant and which are a true reflection of your business and your requirements. We create responsive as well as user friendly websites which are easy to use and navigate and which can be seen the same way regardless of the device being used to view the website. Our SEO services ensure that you improve your rankings on all the search engines and thus equip you to increase your sales and conversion as a result of the increased footfall. Our aim does not limit us to just desktops or laptops. The world is changing and there are more and more people who are using their mobiles for searching and therefore we provide mobile app development on Android, iOS as well as Windows systems. We make it our goal to ensure you get affordable, reliable as well as on time mobile app services. In order to achieve all these goals, we have recruited and are an experienced team of professionals who work solely to create custom solutions for your business needs. We have an impeccable track record and we are committed to our professional relationships. We believe in delivering value to the customers and that too consistently. This is what sets us apart from our competitors. We provide and deliver quality at all the times. The proof of our work is in the repeat customer orders that we receive as well as the recommendations which we have from past customers. The main feedback which we receive is that we are innovative, unique and yet affordable. That is what sets us aside. We do it through high quality designs and innovative technology usage. Our expertise is due to the in-depth research done by our team when analyzing your business and the website you want as well as in implementation of the SEO strategies to make your site search engine friendly and to take your site to the top of the organic search engines.

Our Aim

FIWDC is not one of the website designing companies in Delhi, India which specializes in web design and development but we aim to be the best website designing company in India which is a leader in the field of web development and design and also innovation. We realize that today's world which is a digital one mainly uses techniques of inbound marketing in order to create a strong online presence as well as to advertise to the customers. We therefore strive to provide a holistic approach and we produce relevant and quality social media as well as email marketing, SEO, premium offers and PR as well as PPC content. All these help to pull the target audience towards the services, products and also to the client's company. We are a group of passionate and result oriented individuals which work as a team to achieve amazing results. Coupled with this, we have years of proven experience. Our professionals are experts in not only designing and developing strategies but also executing and fulfilling the needs of our clients and

therefore our aim is to satisfy the client's needs and to spur on overall growth. We aim at delivery of fast and superior results and to be consistent in our approach. Our aim is to deliver for beyond and above the expectations of our clients. We do this through the approach we use. We at FIWDC in fact use whatever we have to ensure that we bring to the table positive results. We blend the SEO along with the website development and design. We also do it with the inbound marketing and all this ties in with just one word – Success for our clients and in turn one step closer to our goal for us. We review the case and based on it we define and determine what the scope of the project should be. We then establish the objectives. After which we scrutinize the whole project, we crunch numbers and check what works and what doesn't. We develop strategies for the campaigns to be launched and set quantitative goals. We also ensure that results are met from the first campaign itself. We build a digital platform that is robust so that the right message is being delivered to the right people and that there is seamless continuity of the brand across the web. We ensure there is functionality that is fully responsive and organic content is deployed to ensure that there is traffic which is sustained. Then based on our analytics, we see the milestones achieved and evaluate where we have progressed. We then refine the strategies again. Therefore, in the process we are able to bring measurable results for our clients. Results which are met at each stage of the process. We design and develop websites and solutions which are tied in with the client's goals mainly of them achieving their targets. It is our vision to ensure that using the SEO the client's websites are taken to new heights. We at FIWDC believe that every business and every client of ours needs to be converted into a brand. We truly believe that online representation is needed for the business and for that we offer not only SEO services but website design and development as well. Our priority is quality as well as creativity and we believe strongly in client satisfaction when it comes to delivery of solutions. We pride ourselves in honesty as well as in creation of value and ensuring that we are a one stop solution provider for all the online requirements of clients. We therefore offer a wide variety and array of IT solutions and thus we also ensure that we meet our goal of becoming a leader of IT service providers in India. We offer development and web designing services so that our clients can create a strong presence online. We also offer development of mobile apps which allow the clients to embrace the new generation of users who rather use and surf the net using their phones rather than their computers. Our SEO services ensure that we reach out and gain more customers and ensure better footfall to the website – thus making sure that the business is converted to a brand. We offer web hosting too and you can take advantage of the various packages that we have on offer. Our services encompass the web training aspect as well. We provide different CMS and web development trainings. Some of our more popular trainings are Magento, WordPress and Open Source. We also provide website maintenance services and thus ensure our client's websites are updated. We do all this to ensure whatever the client's business is, whether it relates to education, health care, real estate, ecommerce, entertainment or even infrastructure, we can help them to achieve what they have set out to do. We allow our clients to get the best bang for their buck and make sure that the latest technology is used so as to ensure higher rankings on the SEO, more clients and the best in class website designed. It is our aim to create websites which are easy when it comes to navigation and aesthetically pleasing as well. We ensure the success of the business by making sure that the business figures in the top rankings of the Google when keywords are searched by the user. We develop the best possible strategies when it comes to PPC campaigns. Thus we ensure that you get optimal results. We also strive to ensure that your site is up and running at top speed at all times. This is why our aim of being a technology driven

solutions for inbound marketing is worked towards, it also helps us for the brand positioning as well as in customer profiling and thus we are able to ensure and create sustainable growth for both our clients and for ourselves. We aim is not to only redesign and customize the client's websites but increase the ease and the accessibility of information too. We increase the website leads and conversion at the same time decrease the PPC budgets and not increase the marketing budget either. Our philosophy: - If you are looking for a job opportunity with a website designing company that not only gives you an opportunity to grow but also lets you work in your own unique way then you must join our website development company at FIWDC. We are the website designing and search engine optimization company that is also involved in website designing and development and we are locally based in Delhi. In fact, we are only such website designing and development company that is based in Delhi. We are dedicated towards providing a good opportunity to our employees to be a part of the growth of the company and also work for their own growth. We provide an environment that is fun and relaxed so that the employees can bring out their best creative ideas. We know that all work and no play make Jack a dull boy but we also know that there has to be work. We encourage our employees to be a part of the growth spiral that is constantly headed to reach new heights. We provide the employees with new challenges with passing day so that they themselves can explore their own potential. We are all about talent and we also know that talent might remain hidden unless someone experienced brings it out. We give you all the opportunities to hone your talent and skills. And, for this we provide an infrastructure that is just right for any talented person. This infrastructure is planned in a way to create environment that is fun yet very serious towards work. Life at FIWDC is not all about work and talent. We know that unless some is mentally and physically fit they will not be able to perform well in their lives and their work. So we make sure that all our employees are healthy and hearty all the time. We know that the cause of loss of work in most of the workplaces is due to the sick leaves taken by the employees and that also leads to the decreased potential of the employees. We make sure that are employees are encouraged to take care of their health by engaging in various extracurricular activities. We do not promote long hours of sitting at your desk because that is one of the prime causes of health problems in the employees. In fact, when you join us we make all arrangements that you feel relaxed and take short breaks frequently to walk around and create some blood circulation in your body. We have complete idea of how the deterioration in the work environment happens and that is due to stress. We are all ears to your problems in the work place and will do all that we can to solve your problems. We provide to the employees a stress free environment to work. We always try to make the workplace so much fun that our employees look forward to coming to the office. The mental stimulation is the main cause of this. Our employees are encouraged to work in a team. We promote cordial and friendly relations among our employees and strongly discourage any kind of office politics. We believe in the philosophy that only a great team can take a company to new heights and that is why we always try to rope in people who like to have fun and want to work in collaboration with others. Our teams are collectively responsible for the achievements that they make and share responsibility of failure together. Our office is a place where we understand the limitations of our employees. We know that you have a family and you need to perform your duties towards them along with the work. For this we make arrangements so that your family does not suffer and you can be present at all the thick and thin of your family. We value your personal life as we know that there is no existence of anyone without a good personal life so, if you are facing a problem at home we stand by you and help you in whatever way we can. Our office is a place that has

been designed to bring growth not only to the company but also to the employees. We at FIWDC have always valued our employees and considered them to be the partners in the growth of the company. It is since the beginning of the establishment of this website designing company that we make sure that all our employees are taken care of. We believe that employees are a part of the family and that if all the family members are happy and satisfied they will lead to a happy and progressive family. We try to make the work place interactive as we like the employees to bond over work place. This creates a harmonious environment that leads to a greater result. We understand that a single person cannot do everything and that is the reason that we constantly promote team building and team work. Our focus is towards creating something unusual and special for our clients and that is only possible if there are many minds at work. To create harmonious environment at work we also make sure that there are small events organized in which a few people are given the responsibility of organizing the event and a others are required to participate in the event. The responsibility of organizing the event is rotated among the employees in order to help them not only enjoy the events but also to hone their organizational and managerial skills. If you are looking for an opportunity to explore your potential while making a good living and having a good time while working then you must join us without fail. We are receptive of the individuals that like to work with others and are able to bring something new and innovative to the table. If you have the willingness to work and explore then we are all set to include you in our team. We are looking forward to bring in the individuals that are fun to work with and yet very serious about the work they do.

Mission and vision of FIWDC

The inception of FIWDC was made on the promise of being in equal partnership with the clients at all levels. We are aware of the fact that we will grow only as much as our clients. This is the reason that we focus entirely on the betterment and benefits of our clients. We make sure that our clients grow in their business and earn as much profit as is possible. When a website is developed it generally finds no place among the thousands of websites available online but with diligent efforts put towards bringing it in notice of the potential clients it is possible to make it one of the most searched website on the net for that particular niche. Our web designing and web development services are aimed at providing the best solution to our clients who want to reach each and every one of the target audience in the Indian market. This is a great way of sharing what you have to offer to your potential clients and keep them hooked to your products and services by making use of your website. Our solutions are not only high in the quality but also are directed towards each of our clients with an individualistic approach. We do not believe in providing one hit formula for all. We know that every client is different. They have different approach, different requirements and different aspirations and we have to make sure that they achieve what they have set out for. We have been known for our different user friendly design ideas and our clients put their full faith in us. The fact that we never leave the client out of the decision making process. At every step we make sure that we take care of the requirements of the clients leading to FIWDC.

- Satisfaction of the customer: this is one of the measures of our achievements. For this make sure that we listen to our customers, their needs, their requirements and make them

understand what is achievable and what is not. We believe in open dialogue at the beginning of the deal. This lets us exceed the expectation as we are able to deliver what we had promised to our clients.

- **Quality of the services delivered:** we never compromise on the services that we offer. We are always committed to deliver services of the quality that is exceptional and that will enable the client to have a website that delivers to the expectation. We do not stop at just creating the product we keep improving upon the product and this is a continuous process for us. Our products are known for performing efficiently and are technologically most advanced as we keep enhancing them according to the latest technology.
- **Our team:** we are the people who put special emphasis on the team work. We are fun loving and love people who have fun. We are ready to incorporate people that have creativity and new vision. We keep pushing the boundaries and expect the same from our team that is always striving to achieve the goals. We believe that our team is the biggest investment and for this reason we always make sure to rope in the best people of the industry in terms of both experience and creativity.
- **Integrity cannot be compromised upon:** we are highly conscious of our integrity. We are responsible for what we deliver to our clients and never shy away from our responsibility. We believe in transparency in our work and make sure that all our work is performed with due honesty. We are not only responsible for our clients but also towards our employees and stakeholders.

We strive hard to perform well and provide timely delivery of the services as per the discussion with our clients. We do not miss deadlines and in fact we deliver before the due time. We have the best of the designers and developers that deliver you results that are best in class because of the uniqueness and creativity they use in developing and designing your website to provide highest standards of products and services. We believe that our growth is directly proportional to our customers' growth and it is the reason that we employ the most cutting edge technology to maintain that competitive for both our customers and us. We keep innovating, and enhancing the technology on a regular basis so that our customers benefit the most from the latest technology available in the Indian market. Also we make sure that we test the technology before we actually use it for our clients so that they do not have to suffer the drawbacks of the technology, if any. We always want the best for our clients and do whatever it takes to deliver the best results. It is due to our most efficient team that we can proudly say that all our clients are satisfied and happy with our performance. But, that does not mean that we stop at that. We know that quality needs to be worked upon continuously at all the times and we make all efforts continuously for the same. Our team is not only creative and has the ability to deliver unique products as per the requirement of the clients but is also the most enthusiastic team that you will ever come across. Since we do not take work to be something that is imposed on us we enjoy doing our work. We rather choose only those people to be the part of our team that have the zeal to work in the industry and are ready to create and deliver something new to the clients for all the projects. We do not try to abstain from the employees that cannot work in a team or have no potential to work in a fun environment. This makes the work place boring and we make so everything in our might to keep our

work place happening and hip both for our employees as well as our clients. We love to work and have fun while working.

Best Website Designing Company in Delhi NCR, India

FIWDC is a fast growing website designing company based in Delhi, India. We are providing superior quality web designing services for small to bigwigs. Our team of creative developers hates mediocre designs. We proudly say that our designs are unique from one site to another. We have designed the websites for various industry verticals including technology, IT, ecommerce, pharmaceutical, training institutes, educational institutes, non-profit organizations and other industries. We understand that every industry is different and needs a different set of customer experience. Our main goal is to make the website appealing and eye catching that it pulls the eye of the audience to engage on the website for a long time. Our group of talented and prowess designers will think out of the box to deliver cost-effective and incredible web designing solutions. We measure our success based on the number of customers acquired every year. Our promotion is merely through word of mouth. We optimize the websites during the construction phase to reach the audience from day one of your website going live. We design the websites from the scratch and revamp the old website and make them responsive to let the clients access the website from any internet connected device. We strongly believe that a website is a mirror image of every business that conveys about your product and service to clients and motivate them to take a desired action. We design the website that meets your business needs and create an incredible user experience. Undeniably, a beautiful website with good functionality would help businesses gain huge traffic and conversion rates.

We develop the websites that are power-packed with the below features:-

- Unique website designs
- Easy to navigate from one web page to another
- Quick page loading time
- Highly responsive
- Give SEO support
- Avoid canonical issue
- Use Drupal, Joomla, HTML, PHP, WordPress, DNN and other latest web designing technologies to design a website
- Has a dedicated team to give round the clock support for clarifying your doubts
- Take your inputs and suggestions in the development phase of the website and enforce the changes to get the website of your vision

- Host on the best web hosting service to reduce downtime
- Use graphics, images, and videos that make your site highly interactive

By working on a gamut of web designing projects, we got to understand the unspoken client needs and deliver the same output. We help the businesses to gain brand reputation in the India market by designing unique websites that can be accessed on the desktop, laptop, tablet, mobiles and the devices that are going to hit the Indian market in the future. We thoroughly understand the bread and butter of your business is your products and services. We use right visual designs to portray your products on the site and leave no stone unturned to make them look appealing. Our experts digital marketing team of creative individuals who are blessed with abundant creativity work relentlessly to deliver stupendous websites. An individual who wants to take their business from local to global level has only one medium to reach the target audience globally, i.e. through the website. We keep the design elements and landing page factors in mind while designing the website. We hand over the projects to the clients on the given timeline within the set budget.

Few of the websites that are designed by our experts include:-

- **Small-size business website:-** If you have a business that you are running for a long time and want to reach the global audience, then the website is the only source. We design an appealing website that let you promote your products and services and reach the people who are in need of your products. Today, customers are searching for the product and service on a website. We strongly believe that every business which is in the booming stage should be available for the clients online to improve their brand presence. Our expert designers will design the website that helps you earn high returns on investment in a matter of a few months.
- **Responsive website with the advent of technology,** the old computing devices are getting obsolete. Earlier, people use to search for a product or service on their laptop or desktop. But, with the mobile revolution, everyone has started accessing the internet through their mobiles. Also, people are making purchases on the go by landing on the mobile compatible website. If you are someone who does not want to miss the loyal customers for your business, then you need to get a responsive website designed. Our skilled designers use their experience, knowledge, and skills to design a responsive website that is easily accessible on all screen sizes while keeping the functionality of the site intact. We fix the visuals on the website in a cluttered-free way to let the images open with ease on all mobile devices without overlapping on the content. Our strong recommendation for every client is responsive device, since it reduces the hassle of the businesses in maintaining different sites designed for each internet connected device.
- **Content Management System (CMS) website:-** Are you looking for a website design that can be managed by you alone without investing high on a website designer to maintain it? Then, we are designing a highly interactive and easy to access CMS website as per the client needs. We use latest web designing technologies, including Joomla and WordPress to design the website. Also, we provide additional services like revamping the website and making minor amendments when

in need. Having this website gives root access to the website owner to modify and delete content without the assistance of a web designer.

- Ecommerce sites gone are the days of going for shopping in a brick and mortar store with the progressing of an ecommerce site. We take great attention to every minute detail from designing a shopping cart to the checkout page to give an enriching experience for the customers. We use latest web designing technologies to compel your audience to land on your site to shop again. Website is the backbone and a replica of every business. We are India's top website designing company in Delhi NCR which will create small to creative websites at an incredibly affordable price. Our unique web designs have received accolades from the clients across the globe. We strongly believe that a website performance totally relies on its web design. Our skilled and talented designers will design the websites where each one is unique over the others. We always strive to let our clientele to give a fierce competition to its clients in the online market. For us, the websites are lead generators for a business. We design the responsive websites with quicker page loading time, call to action buttons, images, and videos that convey about a brand to the audience and compel them to take a desired action immediately. We have been increasing our client base by providing superior quality web designing services. We exclusively focus on web design and use the latest web designing technology to create websites that give unique and enriching experience for the customers accessing the site. At FIWDC, our designers give high priority to user experience in the designing phase of a website that gives desired results and let you convert the prospective clients into potential customers. We at FIWDC, with a pride say that our web designers breathe and live technology. Just a desire of having a great website is impossible until and unless there is careful planning. We take a great care to design the website that meets your website and business goals. Be it a startup company or a bigwig, we sit with the clients to understand their business goals and start the planning to design a website that is impressive and professional. We prepare a wire frame and after the approval from the client, we go ahead and design the website. We give ample liberty for the clients to give their inputs in each phase of web designing process to ensure that the output is as per their vision. At FIWDC, we develop websites that have a high conversion rate and pulls in more traffic. Our sites have rich visuals and elegant prose to engage the audience stays on the site for a long time to explore more about your products and services and take an action. A website that is perfectly designed will convey the customers about your brand and let them find a solution for the problem that they are looking for on your website. No matter whether you want a static, dynamic or a responsive website, we are here to design the site that makes your site stand unique from your rivals. Our designers will make changes to the site until the customer is delighted.

What do we offer to the clients?

We put our persistent efforts to design and perform SEO from the design stage of the website to reach global audience as soon as your site is online. We design, develop, and maintain the website for you. We design the websites by adhering to the design standards and using white hat techniques. Our experienced and professional web designing team delivers websites on time and without taking a toll on

the quality. Our designers will stay on par with the advanced web designing technologies and use those technologies to design the site which would make the company to stay ahead of its competitors in adapting to a new technology. After designing the websites, our digital marketing testers will test the website for page loading issues, SEO issues, and navigational issues on the site. We make sure that the website goes live after fixing all the issues. Our web designs will add aesthetic value to your business and at the same time let you promote your brand to the global audience. We have an enviable track record of delivering quality sites as per the client requirements. Our unique web designs, flawless development, and reasonable pricing have been helping us build trust in the Indian market. Slowly, the businesses are gaining knowledge on the significance of having a website of their own. It is an admirable fact that, an appealing website will grab the attention of the audience to land on your site, go through your products and take a step ahead to make purchases. Below are the web designing services that are offered by us:

- **Design mobile websites:** Maximum percent of online users are accessing the internet through their mobiles. In fact, they are using mobiles to buy products. Ecommerce sites to catch the pulse of the audience are vesting interest in designing the website that is mobile friendly and going for responsive design. Few have exclusively designed a mobile site for their businesses that are completely into product sales. We at FIWDC will design the websites that are mobile compatible and give a great online experience for the users. We give great attention to every minute detail presented on the site from content to images and Call-To Action button for your mobile website to make it easily accessible on all the mobiles irrespective of the screen size.
- **Revamping the websites:** If you believe that you are meeting your business goals despite of being online, then it is time to revamp your website to gain huge traffic and sales for your business. Undeniably, a website with high quality content and poor design will have high bounce rates. Our expert designers and SEO consultants work closely to make your site engaging. We transform the complete look of your website and make it user-friendly. Few companies ignore to revamp their design, hence lose potential customers for their business. In fact, the quality of a business is measured based on its website. The look and feel of the website decides your sales. We believe that website being a marketing tool has to be changed frequently to make yourself present in a unique way to your customers every time when they land on your website. Making minor adjustments time to time let you gain new and reprising customers. Our website designer will audit your website and note down the areas to be enhanced. We revamp the sites by meeting your business requirements. With a team of expertise designers, we take your website to an advanced level by incorporating SEO techniques. If you are in need of a web designing services in Delhi, Noida, Gurugram, Faridabad, South Delhi, West Delhi, North Delhi, East Delhi, Central Delhi and Delhi Cantt, evoke us. We are always there to create a unique and stupendous web design that conveys the essence of your brand.
